

Living logo consists of 19mm thick PVC, hollowed out and filled with natural moss or lichen. We've replaced the sap of the plants with a bio-friendly glycerin based fluid, so the growth is halted and the plant doesn't require any attention, while retaining its natural features.

LIVING LOGO

NO LIGHTING REQUIRED
NO WATER REQUIRED

- Can be cut to any shape up to 18,000 sq. cm. Letter or logo, you decide!
